

QUALITY FENCE

Quality Fence Warranty and Fence Care Information

- Quality Fence warrants our installation and workmanship for the life of the fence. This warranty includes coverage for the following:
 - Sagging gates
 - Posts that become loose
 - Installation deficiencies.
- This warranty does not cover damage resulting from:
 - Severe weather
 - Acts of God
 - Damage from animals (urinating, chewing, etc...). These activities can cause rust and will not be covered.
- Product related issues such as the following shall be covered by each individual manufacturer's warranty:
 - Rust
 - Discoloration
 - Fading
 - Hardware/trim issues
- Quality Fence will register warranties for our customers (when required) at the conclusion of fence installation.
- Quality Fence will also assist our customers with facilitation of warranty claim with manufacturer.
- There is NO warranty on wood fences. Wood is a natural product and if not properly maintained, will fade, discolor, bow, and warp.

Fence care instruction

- **Wood fences:** wood fences must be allowed to cure(dry out) for a period of approximately four to six weeks after installation.
Once curing process is complete, wood fences should be painted or stained. For maximum lifespan, the painting/staining process should be repeated at least every two years.
- **Vinyl fences:** Vinyl fences should be cleaned at least once per year. Do not use high pressure pressure washers on these fences, as they could damage fence. Fence is best kept clean by using an approved cleaner (such as Jomax), then cleaned and sprayed off with water.
